

ClicSeal Plus Pour Lids Non-Mixing

ClicSeal Plus lids are available without a paddle for use with waterborne paints that do not require mixing.

Quart/One Liter or
Half Liter Pour Lid

Quart/One Liter or
Half Liter Pour Lid

Gallon/Three and a
Half Liter Pour Lid

The newly designed ergonomic handle is interchangeable between a one liter/quart or a half liter can for use on any Dedoes machines.

By removing the lock feet, our revolutionary clip design eliminates the risk of scratching the inner liner on waterborne cans.

Designed with the same precision pouring spout and plastic closure blade used with all Dedoes lids.

Our gasket design seals on the inner chime of the can and drastically reduces solvent and water evaporation by having fewer openings in the lid.

All Dedoes lids are sold in quantities of six and are all roughly 0.5 kg (1 lb) each.
